**FOR IMMEDIATE RELEASE**

**OMAX<sup>®</sup> Showcases MAXIEM<sup>™</sup> Abrasive Waterjet Line at SOUTH-TEC**

**Kent, Washington, August 4, 2009** – OMAX Corporation will demonstrate the capabilities of the MAXIEM 1515 at SOUTH-TEC 2009. Like all models in the new MAXIEM line of abrasive waterjet machines, the MAXIEM 1515 integrates proven technologies in a cost-efficient package to provide users with an affordable, highly productive metalcutting solution. OMAX will be located in booth 14076 from October 6 – 8 at the Charlotte Convention Center in Charlotte, North Carolina.

The MAXIEM 1515 features a compact design and is ideal for fabrication shops, metal service centers, trade schools, job shops, architectural, sign, stone and gasket shops. With a table size of 92 inches x 69 inches (2,337 mm x 1,752 mm) and a maximum table load of 125 pounds/square feet, (600 kg/square meter) the abrasive waterjet productively cuts a wide variety of materials, including metal, plastic, glass, ceramics, stone and composites without creating heat-affected zones or mechanical stresses. By cutting parts directly from the plate, the MAXIEM 1515 also dramatically reduces setup time and material usage.

OMAX will demonstrate the MAXIEM 1515 with a 30 hp high-pressure direct drive 50,000-psi pump, and Intelli-MAX<sup>®</sup> Basic, a control containing the core functionality of OMAX's critically acclaimed software. The machine will also feature the patent pending X and Y-axis traction drive system, which is designed to handle an abrasive environment, as well as an Abrasive Nozzle Assembly and a durable abrasive feed system.

For more information on the MAXIEM brand of abrasive waterjet machines, please visit [www.maxiemwaterjets.com](http://www.maxiemwaterjets.com)

OMAX is committed to developing cutting-edge technology and innovative software to ensure that each customer enjoys the benefits of the industry's best abrasive waterjet machines and accessories. As a result, each OMAX product comes with the OMAX Technology Guarantee, which provides software upgrades for all existing customers at no additional charge.

[About OMAX](#)

Headquartered in Kent, Washington, OMAX Corporation is the world leader in abrasivejet machining. Each OMAX JetMachining<sup>®</sup> system is powered by the company's innovative control software, bringing affordable abrasivejet technology to an expanding and diverse group of industries. For more information on OMAX products and accessories, contact Sandra McLain at 800.838.0343 or visit [www.omax.com](http://www.omax.com).
